## **Abstracts**

Global Automated Oil Tank Cleaning System Market is valued approximately at USD XX billion in 2018 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2019-2026. An automated tank cleaning machine is used to clean cargo, process, underground storage tanks and similar equipment such as those found in tank trucks, railroad cars, oil tankers and etc. The increasing domestic demand, decreasing accessibility to high-grade crude oil, and the monetary profits obtained from low grade crude are the few factors responsible for high CAGR of the market over the forecast period. Crude oil is highly viscous, thicker and has more contaminants, enhancing the rise in demand of crude oil which further create the demand of automated oil tank cleansing system market. Further, rise in disposable income, and increasing penetration of tank cleaning robots are likely to impel the demand for Automated Oil Tank Cleaning System over the forecast period. However, high cost is the major factor restraining the growth of global Automated Oil Tank Cleaning System market during the forecast period.

The regional analysis of global Automated Oil Tank Cleaning System Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World.
