## Abstracts

Global Automated Parcel Delivery Terminals Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Automated Parcel Delivery Terminals also known as parcel kiosk refers to technology-based self-service delivery solution. These terminals are largely deployed across crowded places in cities such as retail shopping malls, metro and bus stations, grocery stores, and train stations among others. Automated parcel delivery terminals facilitate automated delivery and return facilities 24 hours a day. The rapid growth of e-commerce business and increasing automation across different industries as well as recent product launches are factors that are accelerating the global market demand. For instance, according to Statista - In 2021, the worldwide retail e-commerce sales amounted to USD 4900 billion, and this figure is projected to grow to USD 7400 billion by 2025. Furthermore, leading market players are coming up with innovative products to capitalize the rising adoption of automated parcel delivery systems. For instance, in June 2020, Quadiant launched its new automated parcel delivery solution named The Parcel Pending Lite. This new parcel locker system features compact modular design and can be easily installed in small shops for a limited number of parcels on a daily basis. Also, growing advancements in logistics and transportation sector and increasing internet penetration globally are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high deployment cost and large installation space for deployment impede the growth of the

market over the forecast period of 2022-2028.

The key regions considered for the global Automated Parcel Delivery Terminals Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing number of technological advancements and presence of leading market players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as growing penetration of 5G technology and rising logistics industry in the region, would create lucrative growth prospects for the global Automated Parcel Delivery Terminals Market across the Asia Pacific region.
