Global Automatic Feeding Machine Market is valued at approximately USD 5.9 Billion in 2021 and is anticipated to grow with a healthy growth rate of more than 7.5% over the forecast period 2022-2028.

Automatic Feeding Machine is used to feed the animal in different farm to reduce the labor-intensive work. On a dairy farm, feeding the cows is a labor-intensive procedure that takes a lot of time. It becomes difficult and time-consuming to feed the cattle the right mixture of grain at the right times. For livestock producers, the automated feeding system is a feeding solution that enables them to efficiently and profitably produce milk. The major driving factor for automatic feeding machine is the increasing number of dairy and beef cattle on farms. Dairy products market share in 2021 was milk acquired with 60.6% of the market, cheese with 18.7%, butter with 4.5%, followed by other dairy products yoghurt with 9.2% and others 0.55. The increasing demand for meat and dairy products among people is accelerating the demand of this market. The global dairy products market size is valued at USD 499.7 billion in the year 2021 and is projected to hit USD 240 billion in the upcoming year 2030. Furthermore, increasing technological advancement along with the new product launches and development and various

services which include hardware and software is giving the opportunity to this market to grow. However, a high amount of capital for the installation and maintenance is the major restraint which impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Automatic Feeding Machine market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia-Pacific is the leading region across the world in terms of market share due to the huge population and increasing demand for milk, incising milk production and rising government initiatives for boosting milk production along with rapid urbanization. On the other hand, North America is recorded to be the fastest growing region in this market because of the rising penetration of restaurants and fast food. Restaurants such as burger king, Pizza Hut, Domino's and other have extensively used cheese and butter as major products.
