## **Abstracts**

Global Automatic Fire Ball Extinguisher Market is valued at approximately USD 801.7 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.3% over the forecast period 2022-2029. An Automatic Fire Ball Extinguisher is a type of fire suppression device that uses a ball-shaped container filled with fire-retardant chemicals or agents that can extinguish fires automatically when it comes into contact with flames. The ball is designed to self-activate in the event of a fire, meaning it does not require any human intervention to operate. The device typically consists of a hollow, lightweight ball made of plastic or metal that contains a dry chemical powder or foam. When a fire breaks out, the ball's outer shell will melt from the heat, allowing the powder or foam to disperse and extinguish the fire. The ball can be placed in areas where fires are most likely to occur, such as kitchens, electrical rooms, or other high-risk areas. The market demand is primarily driven by the factors such as Automatic fire ball extinguishers are easy to install and require little to no maintenance. This makes them an attractive option for small businesses and residential applications, coupled with Automatic fire ball extinguishers use non-toxic and environmentally friendly materials to extinguish fires, making them a safer and more sustainable option compared to traditional fire suppression systems.

In 2021, 1,353,500 fires killed 3,800 civilians and injured 14,700. In addition, there were 70 non-COVID-19 on-duty firefighter deaths and 78 COVID-19 firefighter deaths in 2021, thus, in turn, these factors are likely to escalate the demand for Automatic Fire Ball Extinguisher in the global market. Furthermore, many countries have strict fire safety regulations by government that require the installation of fire suppression systems in certain buildings or areas. The increasing enforcement of such regulations is driving the demand for automatic fire ball extinguishers, as well as the construction industry grows, the demand for fire safety equipment like automatic fire ball extinguishers is also expected to increase are presenting lucrative opportunities for market growth over the forthcoming years.
