Abstracts

Global Automatic Lubrication System Market is valued approximately at USD 0.84 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 4.5% over the forecast period 2021-2027. Automatic lubrication, often known as centralized lubrication, is a cost-effective method of boosting machine availability by enhancing equipment performance. This system is capable of supplying lubrication at precise intervals, thereby minimizing the wear and tear of system components such as bearings, gears, pins, and brushes. It is frequently utilized in the steel and manufacturing industries. The rise in awareness and adaptability for adopting automated lubrication systems in industrial industries is a primary driver of market expansion. Furthermore, improved time efficiency through automatic lubrication in comparison to manual lubrication, as well as increasing worker safety concerns, all of which contribute to market growth. For instance, as per Statista, in 2019, China's lubricants market amounted to some 7.3 million tons, making it the world's largest lubricant demanding country. However, in 2018, automotive oils accounted for a 57 percent share of the total global demand for lubricants. However, lack of awareness among end-user industries may impede the market. Furthermore, product innovation is expected to present growth opportunity over the forecast period of 2021-2027.

Geographically, Europe has the largest market share. leading sectors such as

automotive, mining, steel, electronics manufacture, and agriculture have boomed in the European region. The European industrial ecosystem has embraced automation and digitalization in response to the need for more efficient production. Europe has become a large market for automatic lubrication systems due to the increasing need to adopt efficient machinery and equipment, as well as maintenance procedures. However, Asia Pacific is the fastest-growing region, including Japan, India, and China. Massive domestic demand for goods and services has allows industries such as steel, cement, and energy to grow in the region. This presents the automated lubrication system market with a variety of attractive opportunities.
