Global Automatic Polarimeter Market to reach USD XX billion by 2025.

Global Automatic Polarimeter Market valued approximately USD XX billion in 2017 is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2018-2025. The Automatic Polarimeter Market is continuously growing in the global scenario at a significant pace. Polarimeter refers to a device used for gauging the optical activity of a fluid. A polarimeter measures the optical activity of a liquid by transmitting polarized light through it and gauging angle of the emitted light. The substance which are optically active tend to rotate the polarized light, whereas optically inactive substances attain an angle of 0°. A polarimeter was initially developed for the purpose of studying analogous enantiomers. Increasing need to analyze optically active fluids and changing preference from manual polarimeter to automated polarimeter are the substantial drivers of the market across the globe. Moreover, growing demand from diverse sectors such as food & beverages, chemical and agriculture is likely to creating numerous opportunity in the near future.
