Global Automotive 3D Imaging Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Automotive 3D imaging refers to application of camera and LiDAR based sensor solutions used in autonomous and semi-autonomous vehicles. As built-in features, this technology provides protection, anti-theft features, and parking surveillance, as well as forensics, social media, healthcare, and mobile commerce. These imaging solutions are a vital part of an advanced driver-assistance system (ADAS) that assists the driver during the driving process. The increasing demand for autonomous vehicles and growing adoption of ADAS system by automotive companies are key factors driving the market growth.

The rise in demand for autonomous vehicles is contributing towards the growth of the Global Automotive 3D Imaging Market. For instance, according to Statista – in 2021, the global autonomous car market was valued at USD 27 billion, and the market is projected to grow to USD 62 billion by 2026. Furthermore, as per Statista – in 2019, Globally around 1.4 million units of autonomous vehicles were sold, and as per estimates by 2030, the global sales of autonomous vehicles would grow to a value of around USD 58 million units. Also, growing advancements in automotive 3d imaging systems and increasing investment in cloud infrastructure for autonomous driving would create lucrative growth prospectus for the market over the forecast period. However, the

high cost of Automotive 3D Imaging solutions stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Automotive 3D Imaging Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the increasing development of self-driving vehicles and presence of leading market players in the region. Whereas Asia Pacific is expected to grow with a highest CAGR during the forecast period, owing to factors such as rising adoption of ADAS system in passenger cars and increasing penetration of leading market players operating in the automotive 3D imaging space in the region.
