## **Abstracts**

Global Automotive Brake Hose Market is valued approximately USD XXX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2027. Automotive Brake Hose are flexible tube connecting the braking pipes of adjoining vehicles. The hose carries brake fluid from brake line fixed to the car's body to the brake caliper on the wheel. The enhanced flexibility of the hose allows the wheel to move with suspension. The market growth is primarily driven by rising demand for lightweight vehicle across the globe. As per OICA, the production of Light Commercial vehicles increased by 3% in the European Union countries. As in the first quarter of 2018 the production in France was 495 thousand units which increased to 527 thousand units. Similarly, in Spain the production increased from 496 thousand units to 524 thousand in the same period. The increasing demand for better and efficient braking system is the major factor driving the market growth. Furthermore, the supportive governmental policies regarding the safety concerns of the passengers is expected to drive the market growth in near future. However, the use of liners as an alternative is the major restraint to the market. However, use of liner as an alternative impedes the growth of the market over the forecast period of 2020-2027.

The regional analysis of global Automotive Brake Hose market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading/significant region across the world in terms of market share owing to the growing production in automotive and presence of major OEMs in the region.
