## **Abstracts**

Global Automotive Emission Test Equipment Market is valued approximately at USD 573.57 Million in 2020 and is anticipated to grow with a healthy growth rate of more than 4.40% over the forecast period 2021-2027. Automotive emission test equipment is used to test and check the viability of component as per the regulations and standards of the industry. Rising integration of electronic component in the vehicles, increasing government norms to curb the carbon emission and technological advancements in automotive emission test equipment are fueling growth in the market. For instance, in October 2020, Opus Inspection unveiled a new collision scanning solution, ScanSafe. ScanSafe is a comprehensive scanning solution that brings together OEM scanning, calibration, programming, aftermarket quick scanning, and live diagnostic support. Furthermore, research and development activities and rising sales of electric vehicles are expected to propel the demand for automotive emission test equipment. Such as, according to Statista, between 2020 to 2026, global electric vehicle market is expected to increase by four-fold to reach an estimated size of USD 725 billion by 2026. However, nonadherence to stringent vehicle emission testing norms by vehicle manufacturers may hamper the demand in coming years.

Europe is the leading region among Asia Pacific, North America, Europe, Latin America, and Rest of the World, owing to rising adoption of vehicle emission testing norms and

strict regulations in the region. Asia Pacific is expected to grow at the fastest pace during forecast period, owing to growing urbanization and rising initiative for introducing and implementing vehicle emission norms.
