Global Automotive Engine Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. An Automotive Engine is considered a significant component of a vehicle. It is integrated to generate power for smooth and efficient functioning. It also helps in improving fuel efficiency and lowering car pollutants. The thriving growth of the automotive industry, rising sales of passenger cars & commercial vehicles, coupled with the rising inclination for high-performance and fuel-efficient vehicles and extensive developments are the chief factors excelling the global market demand. For instance, as per Statista analysis, the automotive industry generated a revenue of around USD 5,315 billion in 2017 and the amount is projected to grow and reach USD 8,931 billion by 2030. Accordingly, the development of the automotive industry is exhibiting a positive influence on the market growth across the globe. However, the growing adoption of electric cars and huge R&D costs involved in developing advanced technologies are hampering the market growth over the forecast period of 2022-2028. Also, the increasing disposable income and substantial development of the emerging markets are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Automotive Engine Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the increasing investment in infrastructural development and existence of long-established

original equipment manufacturers. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028.
