## **Abstracts**

Global Substation Monitoring System Market is valued approximately USD 3.80 Billion in 2019 and is anticipated to grow with a healthy growth rate of more than 7.80% over the forecast period 2020-2027. Substation monitoring system provides the information about the electrical transmission and distribution network. The substation monitoring comprises monitoring of different parameters such as voltage, frequency, power input and output of a substation. The data is collected to transmitted through communication technologies to the main station. Substation monitoring system are highly variable, depending on the type of substation, voltage levels, load capacity, grid integration and many other technical parameters. Growing government initiatives regarding promotion of renewable energy across the globe and remarkable application of substation monitoring systems to monitor various components of used in renewable energy transmission system are escalating the growth of market. For instance: According to the Indian Brand Equity Foundation, installed renewable power generation in India grown with CAGR of 17.33% between 2016-2020 and stood at 87.26 GW out of which wind & solar comprised 34.74 GW and 34.81 GW respectively. Also, in 2018, India owned 22 nuclear reactors in operation in 7 nuclear power plants which is having installed capacity of 6,780 MW and produced over 35 Twh of nuclear power in 2017. Similarly, Renewable energy policy by the United States includes policies such as Federal Production Tax Credit (PTC), the Investment Tax Credit (ITC), and the Modified

Accelerated Cost-Recovery System (MACRS). Such policies deal with providing economic incentives and subsidies to manufacturer for making production price of renewable energy more cost competitive with tradition fossil fuels. In addition, growing demand for reduction in transmission and distribution losses is the factor restraining the growth of market.

The regional analysis of global Substation Monitoring System Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the increasing IOT based communication network. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as increase in demand for renewable energy projects would create lucrative growth prospects for the Substation Monitoring System Market across Asia-Pacific region.
