## **Abstracts**

Global Automotive Gears Market is valued at approximately USD 34.10 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 6.2% over the forecast period 2019-2026. An automotive gear is a rotating part having teeth, which structures a mesh with another toothed part or gear and transmits torque. The gears can transform torque, speed and direction of the power source and are believed to be a crucial component in an automotive system for its movement. Surging production of vehicles, rise in demand for improved acceleration and low carbon footprint in the automotive vehicles and rise in the installation of mechanized & automated parts in automobiles are the few factors responsible for high CAGR of the market over the forecast period. For instance: Globally, it is estimated that production of car was around 72.1 billion in 2016, and this figure is increased to 73.5 billion in 2017, according to the International Organization of Motor Vehicle Manufacturers (OICA). Furthermore, in India, the two-wheeler sales reached an all-time high-level as of 2019 which is nearly 21 million units, represent an increase from approximately 11 million units since 2011. Thus, rise in production of vehicles is expected to surge the demand for automotive gears across the world. Moreover, emergence of technologically advanced gear system along with development of automotive sector in developing countries such as India and Brazil are the major factor likely to create lucrative growth opportunity to the market in the upcoming years. However, high cost of high-end gear systems and low penetration

of advanced geared vehicles in high volume market are few factor anticipated to hindering the growth of global Automotive Gears market during the forecast period. The regional analysis of global Automotive Gears Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-pacific is the leading/significant region across the world in terms of market share due to the increasing vehicle production in countries such as India and China and increasing need for fuel-efficient vehicles along with lightweight automotive parts in the region. However, North America is anticipated to be as second-largest region for automotive gears market due to the growing trend of installing mechanical parts in passenger cars and presence of large customer base for vehicles in this region.
