## **Abstracts**

Global Automotive Keyless Entry System Market is valued at approximately USD 1.72 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 12.8% over the forecast period 2022-2028. The electronic locking element of the car keyless entry system protects access to the vehicle electronically and eliminates the traditional mechanical key. Vendors will be encouraged to provide superior vehicle keyless entry systems to the market as smartphones become more integrated and demand for linked automobiles grows. The market growth is driven by adoption of smart technology for vehicle safety and product development to cater to changing demand patterns. For instance, HELLA GmbH & Co. KGaA introduced a digital automobile key with ultra-wideband technology in June 2021. Similar product launches and advances by these players contribute to the growth of the global automotive keyless entry system market. Furthermore, growing investment in research and development by private players boosts the market growth in coming years. For instance, Kia and Hyundai, major South Korean automakers, are investing in research and development for the Keyless Entry Access System. Kia introduced the Carnival with a keyless entry system in February 2020, while Hyundai introduced a new version of the Creta with a keyless entry system in March 2020. However, decrease in production and sale of automobiles impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Automotive Keyless Entry System Market

study include Asia Pacific, North America, Europe, Latin America, and Rest of the World.
