## **Abstracts**

Global Automotive Powertrain Market is valued approximately at USD XXX Million in 2020 and is anticipated to grow with a healthy growth rate of more than 5% over the forecast period 2021-2027. An automotive powertrain is an assembly of various components that pushes vehicle forward. The global Automotive Powertrain market is being driven by rapid growth in trend of downsized engines and increase in demand for automatic transmissions. Furthermore, the sales and penetration of cars, will provide new opportunities for the global Automotive Powertrain industry. For instance, according to the report of International European Agency, around 3 million new electric cars were registered in the year 2020, which depicts the increase of around 41% as compared to the year 2019. As a result, increased sales of cars across the world will necessitate the use of more automotive powertrain in the manufacturing of different automobile parts, which will serve as a catalyst for the Automotive Powertrain industry in the future. However, stringent emission norms, may impede market growth over the forecast period of 2021-2027.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are the key region considered for the regional analysis of global automotive powertrain market. Rise in number of vehicles production and increase in penetration of passenger cars in various region makes Asia Pacific the leading region across the world in terms of

market share. Whereas North America is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, rising demand for usages of advanced powertrains that are light weight and helps in increase in fuel efficiency and reducing carbon emission .
