## **Abstracts**

Global Automotive Spark Plugs And Glow Plugs Market is valued at approximately USD XX billion in 2022 and is anticipated to grow with a healthy growth rate of more than XX% over during the forecast period 2023-2030. Automobile engines typically fall into two categories: diesel engines and gasoline engines. In gasoline engines, spark plugs generate an electric discharge that ignites the gasoline, initiating combustion within the engine. Conversely, in diesel engines, glow plugs serve a similar purpose by generating heat, which aids in igniting the diesel fuel, particularly in cold weather conditions. Glow plugs are installed within the cylinder head of a diesel engine, while spark plugs are positioned within the cylinders of a gasoline engine. Both glow plugs and spark plugs are integral components of their respective ignition systems, facilitating the ignition process essential for the operation of both diesel and gasoline engines. The market growth is driven by key factors such as the growing adoption of high performed vehicles, the growing automotive industry, increasing adoption of Electric vehicles.

For instance, during the initial six months of 2023, the European Union witnessed notablesignificant growth in various automotive sectors. New van sales surged by 11.2%, while new truck sales saw a remarkable increase of 20%. Additionally, new bus sales experienced a significant uptick of 15% compared to the first quarter of 2022. These positive trends were facilitated by the alleviation ofalleviating supply chain constraints during the forecastis period. There has been a significant increase in global

automobile production and sales post-pandemic. Moreover, following the pandemic, there has been a notable uptick in automobile production and sales worldwide. For instance, as per Statista, in 2021, global car sales surged to approximately 66.7 million units, marking an increase from around 63.8 million units in 2020. Additionally, SUVs accounted for over 45% of total global car sales in 2021. These trends are anticipated to fuel the expansion of the global automotive industry, consequently bolstering growth within the automotive glow plug sector. However, increasing electrification of vehicles stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Automotive Spark Plugs and Glow Plugs Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. Asia Pacific is leading the overall market share of the market, also expected robust growth at a healthy Compound Annual Growth Rate (CAGR). This regional market dominance is fueled by the rising sales of automobiles and escalating demand for vehicles. Asia Pacific is expected to be the fastest growing region in the upcoming years outshines other regions in terms of profit contribution, primarily due to the abundance of automotive producers and substantial car sales across the region's countries.
