## **Abstracts**

Global Automotive Temperature and Humidity Sensors Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Automotive Temperature sensors are used to measure temperature at different places in a vehicle. Whereas, humidity sensors prevent misting-up of the windows and enhance comfort by managing the humidity levels inside the vehicle. Moreover, these sensors are also used near the exhaust chamber to maintain urea quality, level, and temperature. Some of these sensors include urea pump pressure and exhaust gas temperature (EGTS) sensors among others. The increasing adoption of Electric and Autonomous Driving Vehicles and growing usage in HVAC Applications as well as strategic initiatives from leading market players are key factors accelerating the market growth.

The increasing adoption of electric & autonomous driving vehicles is contributing towards the growth of the Global Automotive Temperature and Humidity Sensors Market. For instance – as per Statista – as of 2021, the global autonomous car market was valued at USD 27 billion, and the market is projected to grow to USD 62 billion by 2026. Moreover, the increasing usage of sensors in automotive HVAC applications is another key factor driving the market space. For instance, according to Statista – in 2020, the global market for heating, ventilation, and air conditioning (HVAC) was valued at USD 250.67 billion, and the market is projected to grow to USD 367.5 billion by 2030.

Also, increasing demand for luxury passenger cars and rising advancements in automotive sensor technology would create a lucrative growth prospectus for the market over the forecast period. However, the high cost of Automotive Temperature and Humidity Sensors stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Automotive Temperature and Humidity Sensors Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the increasing adoption of autonomous vehicles and presence of leading market players in the region.
