## **Abstracts**

Global Aviation Connector Market is valued at approximately USD 4.78 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.6% over the forecast period 2022-2029. Aircraft lighting, user power systems, seat actuators, and intelligent peripheral devices with power ranging from low to high all frequently use aviation connectors. The Aviation Connector market is expanding because of factors such as increasing demand for aircraft across the globe, the adoption of advanced avionics systems, and improving flight safety.

Moreover, for high-definition video and high-speed online connectivity, passenger amenities like in-flight entertainment and internet access need a high transmission rate. Because fibre optic technology uses less power and other resources, it is a great choice for sending high-speed data. For instance, 66% of passengers, according to Inmarsat Aviation's 2018 Inflight Connectivity Survey, think in-flight Wi-fi is essential. Additionally, the demand for aircraft connectors in the market was increased by the requirement for vibration-free and dependable connectors. However, the high cost of Aviation Connectors stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Aviation Connector Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Due to the

presence of significant aircraft manufacturers and producers of aviation avionics systems in the area, North America is anticipated to dominate the market over the forecast period. Some of the well-known American aircraft manufacturers are Boeing, Lockheed Martin, GE Aviation, United Technologies, Gulfstream Aerospace, and Sikorsky Aircraft. Additionally, it is anticipated that during the forecast period, the Europe region will register the fastest growth over the projected period. The replacement of outdated military aircraft with modern combat aircraft is to blame for the rising demand for aviation connectors in Europe.
