## **Abstracts**

Global Axial Piston Pumps Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Axial Piston Pumps can be defined as positive displacement pumps that use multiple cylinders coupled around a central axis. These pumps are utilized in industrial and mobile applications to convert mechanical energy into fluid power energy. Axial. These pumps have applications in Electric mobile machines, Earth moving machines, Construction machinery, Material handling machines, and Forklift trucks among others . The rising Water and Wastewater treatment Industry and increasing end use applications in different industries as well as rapid industrialization and urbanization are factors that are accelerating the global market demand. For instance, according to Statista – global market for water and wastewater treatment was estimated at USD 263.07 billion, and the market is projected to grow to USD 500 billion by 2028. Furthermore, in December 2021, Kirloskar Brothers Limited (KBL), launched its new a new mini range pump named AARNA. AARNA mini pump is available in 0.5 hp and 1.0

hp variants. Also, growing R&D activities towards technical innovation and design upgradation and rising Investments towards Water and Wastewater Treatment Facilities are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, fluctuation in in raw material prices impede the growth of the market over the forecast period of 2022-2028.
