Abstracts

Global Baby Drinks Market is valued approximately at USD 114.1 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 10.40% over the forecast period 2021-2027. Baby drinks are used as an alternative or an additional food for the infants due to the similar nutrient contents. The global Baby Drinks market is being driven by growing women professionals and increase in population growth rate. For instance: according to the greatbusinessschools.org, in United States, between 2014 and 2019, the number of women-owned companies has seen the growth rate of 3.9% annually. Also, according to the catalyst.org, in 2019, the share of women in senior management positions globally grew to 29%. Another major driving factor for the market is the introduction of new products. For instance: in March 2021, Danone launched Aptamil pre-measured tabs, which can be dissolved in water for baby food. Furthermore, the growing consciousness regarding the health of the infants, rising urbanization, rising personal disposable income and the rising research and development by the companies, will provide new opportunities for the global Baby Drinks industry. However, cases of contamination in the formula and presence of strict regulations by the authoritative organizations may impede market growth over the forecast period of 2021-2027.

The regional analysis is segmented as the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest for the World of the global Baby Drinks Market. Asia Pacific is the leading region across the world in terms of market share and also is anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due

to growing population, rising working women, rising awareness for healthy infant food products and enhanced standards of living have stimulated product demand in the region.
