Abstracts

Global Baby Feeding Bottle Market is valued approximately USD 2.85 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.70 % over the forecast period 2022-2028. Bottle feeding is an infant feeding method that has been around since ancient times, and nowadays, a large number of babies are fed by bottle using either breastmilk or formula. The market size of baby bottle is increasing which is driving the growth for the market over the forecasted period. Furthermore, the strategic moves by the key market player in product development is driving the growth for the market over the forecasted period. Pigeon Corporation inaugurated its Tsukuba Engineering Center in February 2022. The Tsukuba Engineering Center will serve as a focal point for actively researching and prototyping productivity enhancements as well as innovative environmentally friendly materials and manufacturing processes. This will also aid with training programmes, with a focus on nursing bottle goods. Also, with rising number of working women the adoption & demand for Baby Feeding Bottle is likely to increase the market growth during the forecast period. However, the market's expansion is further limited by the intricacy involved with the distortion of bottles maintained in freezers.

The key regions considered for the global Baby Feeding Bottle Market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the significant region across the world in terms of market share owing to the growing demand for the feeding bottle in the region. Whereas, Europe is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as rising population of working women would create lucrative growth prospects for the Baby Feeding Bottle market across Asia-Pacific region.
