Abstracts

Global Bag-in-Tube Market is valued at approximately USD 3.37 million in 2021 and is anticipated to grow with a healthy growth rate of more than 13.1 % over the forecast period 2022-2028. The Bag-in-tube is a unique packaging solution for high-end liquids and semi-liquids including wine, spirits, maple syrup, and olive oil. A composite cardboard tube with a tinplate cap and base constitutes the Bag-in-tube. The product is dispensed through a high-performance Vitop tap from a tube with a double-layered bag inside. Factors such as preference for bag-in-tube for its 360° area accessible for printing and embossing, as well as the potential to offer an extended shelf life of up to 6 to 8 weeks after opening the pack, are driving the bag-in-tube market expansion. Innovative packaging, such as bag-in-tube and bag-in-boxes, appeals to millennials since they are easy to transport and store creating opportunities for manufacturers worldwide. As a transition away from glass-based packaging toward plastic packaging materials, in the bag-in-tube market, anti-counterfeit packaging is being introduced which is trending in the market. For Instance, Bag-in-tube packaging saves wineries more than 40% on packaging costs and 50% on weight when compared to traditional glass bottles. The fierce competition among market players is projected to stifle the bag-in-tube market's growth. over the forecast period of 2022-2028.

The key regions considered for the Global Bag-In-Tube Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. From 2022 to

2028, demand for bag-in-tube is predicted to skyrocket in the Asia Pacific area. This can be ascribed to the packaging industry's overall rise in this region.
