Global Bandsaw Machines Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. A bandsaw machine is a cutting machine which holds long tooth blades with rotating on wheel that cut material held on a table platform. Metal, wood, plastic, and other materials can be cut by band saw. Growing automotive industry and growing demand of biomass-based products are key drivers for the growth of Bandsaw Machines market. For instance, according to The International Energy Agency (IEA) – after a sharp decline in the year 2020 due to global supply chain disruption, total biofuel demand is on course to suppress 2019 levels in the year 2021. As per estimations, annual global demand for biofuels is projected to grow by 28% by the year 2026 and would reach to 186 billion litres from 151 billion litres in the year 2019. Asia would account for almost 30% of new production over the forecast period. Also, with the increasing industrialization in emerging economies and rising industrial automation, the adoption & demand for Bandsaw Machines is likely to increase the market growth during the forecast period. However, negative impact of covid 19 pandemic on end use industries and supply chain disruption impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Bandsaw Machines Market study includes

Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to growing industrial automation in the region. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2022-2028.
