## Abstracts

Global Barbiturate Drugs Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Barbiturates are drugs that affect the central nervous system. Barbiturates are chemical derivatives of barbituric acid. Barbiturate medicines come in a variety of forms, but they all have a relaxing impact on the central nervous system and are used to treat anxiety in therapeutic settings. Sleeplessness, Epilepsy, and status epilepticus are all treated with barbiturates. Barbiturate medications come in tablet form and can be administered either orally or intravenously. Increase in geriatric population and rise in prevalence of target diseases drive the growth of Barbiturate drug market. For instance, as per Statista, Japan had the largest proportion of the total population over the age of 65 in 2021. Japan boasts the world's oldest population, with 29 percent of the population over 65. Germany, on the other hand, will have 22% of its population over the age of 65 in 2021. Furthermore, according to Gallup, employees in the United States and Canada saw the greatest levels of daily stress (57 percent), whereas stress in Western Europe fell to 39 percent in 2019 from 46 percent in 2018. Also, with the rise in prevalence of insomnia and rising stress levels in society the adoption & demand for Barbiturate Drugs is likely to increase the market growth during the forecast period

However, side effects associated with Barbiturate Drugs impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Barbiturate Drugs Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is leading the market share globally, owing to the highest percentage of insomnia affected patients. However, Barbiturate medications are predicted to be the second most popular in Asia Pacific, excluding Japan. The growing stress level of the working population, as well as the quickly developing healthcare infrastructure, may be contributed to the market's growth in the region.

Major market players included in this report are:

Par Pharmaceutical

Intas Pharmaceuticals Ltd.

Samarth Life Sciences Pvt. Ltd.

Centurion Healthcare Private Limited
