Abstracts

Global Barge Transportation Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Barge is a flat-bottomed vessel, built for transportation purposes on river and canal and lake among others. It is primarily used for transport of bulk goods. As barge does not feature any self-propelling mechanism, therefore a barge needs to be pulled by tow or a tugboat. Growing Cross border trade in post pandemic era and rising number of barge deployments as well as surging Logistics industry in emerging markets are key factors driving the Barge Transportation Market. For instance, according to Statista- In 2021, the Indian logistics market was valued at USD 250 billion, and this amount is estimated to grow to USD 380 billion by 2025. Furthermore, In January 2022, Kentucky, United States based Yager Marine Industries unveiled a new barge, that the company developed for US based Waterways Barge LLC , a provider of Barges and equipment on lease. Its dimensions include 150- by 60- by 9-foot and it features four spud wells and two 30-inch-square by 50-foot-long spuds and it is intended to support heavy cranes. Moreover, in March 2022, The Indian coast guard launched a new auxiliary barge named Urja Prabha in India. This new barge Urja

Prabha is 36.96 metres long with draft of 1.85 metres, and it is intended for cargo ship fuel, aviation fuel among others. Also, rising investments in port modernization and waterways and growing cross border trade in emerging economies are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high operating expenses in barge transportation and stringent government regulations impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Barge Transportation Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading market players and growing waterways transportation in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as rising investments on waterways development and growing cross border trade in the region, would create lucrative growth prospects for the Barge Transportation Market across the Asia Pacific region.
