Abstracts

Global Bathroom and Toilet Assist Devices Market is valued at approximately USD 4.72 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.4% over the forecast period 2022-2029. Bathroom and toilet assist devices are technologically advanced equipment that is designed to help in navigating specified areas or lend strength to specific afflictions. This offers convenience and improves accessibility and ease of operation, especially for old and disabled patients. Some prominent factors that are attributing to the flourishing market demand are the rising geriatric population, increasing availability of products on online mode of distribution, coupled with the growing disabled population.

According to the United Nation, in 2019, there were 703 million people worldwide aged 65 or older, which is expected that there will be 1.5 billion people by the year 2050. Thereby, the rising number of geriatric people is exhibiting a positive influence on the growth of the bathroom and toilet assist devices market. In addition, the growing investment in research and development, as well as increasing technological developments by the key market players are presenting lucrative opportunities for market growth in the foreseen period. However, the high cost of devices or equipment, along with the lack of awareness regarding product availability are hindering market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Bathroom and Toilet Assist Devices Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the

World. North America dominated the market in terms of revenue, owing to the increasing spending on R&D activities to introduce advanced products and favorable government initiatives. Whereas, the Asia Pacific is expected to grow with the highest growth rate during the forecast period. Factors such as rising awareness about assistive devices, a rise in the aging population, and untapped opportunities in emerging countries, are burgeoning the market growth in the forecasting years.
