Abstracts

Global Batter and Breader Premixes Market is valued at approximately USD 2516.5 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.4% over the forecast period 2022-2028. Batter and breader premixes are food coatings that can be used to improve the flavor, texture, and moisture content of meat, poultry, vegetables, fish, and shellfish while frying or grilling. Batter is a thin coating that is used to keep the food wet during deep frying. It's made with flour and liquids like eggs, milk, or water. Batter and Breader premixes market is driven by increasing inclination of the consumers toward convenience foods and growing trend of fast-food culture both among young and youth populations. As per Statista, in 2022, the Convenience Food category is expected to generate USD 22.84 billion in revenue. Revenue is estimated to rise at a 20.26 percent annual rate (CAGR 2022-2025), resulting in a market volume of USD 39.72 billion by 2025. Furthermore, the global per capita consumption of chicken increased from 83.8 pounds in 2014 to 93.8 pounds in 2018, according to the National Chicken Council. Since chicken is a low-calorie meat compared to pork and beef products, this is owing to shifting customer preferences for healthier choices. However, the shift toward fresh food products impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Batter and Breader Premixes Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is leading the market, owing to higher consumption of meat and higher number of fast-food outlets. However, Asia Pacific is expected to be the fastest growing region due to increased awareness of the benefits of batter and breader premixes, as

well as an increase in seafood and meat consumption, as well as acceptance of convenience and seafood dishes.
