Abstracts

Global BCG Vaccine Market is valued approximately at USD 23.25 million in 2019 and is anticipated to grow with a healthy growth rate of more than 4.53% over the forecast period 2020-2027. The Bacillus Calmette-Gurin (BCG) vaccine is the only vaccine available to prevent tuberculosis (TB). In countries with a high prevalence of tuberculosis, one dosage is prescribed for babies close to the time of birth. However, in regions where tuberculosis is rare, only children at high risk are usually immunized, while confirmed cases of tuberculosis are directly screened and administered. The vaccine also immunizes people not diagnosed with tuberculosis and are not vulnerable to drug-resistant tuberculosis. Rising prevalence of tuberculosis, especially in developing and underdeveloped countries, as well as technological advances in the field of vaccine science, are the major factors driving the growth of the BCG vaccine market. Also, as per the Global Tuberculosis Report of 2018, the majority of TB patients (66%) live in one of eight countries: India (27%), China (9%), Indonesia (8%), the Philippines (6%), Pakistan (5%), Nigeria (4%), Bangladesh (4%) or South Africa (3 percent). In addition, growing birth rates across the world, especially in China and India, are leading to substantial demand growth. Moreover, cohesive government policies and a global focus on immunization services are pushing the growth of the market upwards. Untapped investment markets in developing regions are projected to have several possibilities for market expansion.

However, side effects of BCG vaccines impede the growth of the market over the forecast period of 2020-2027.

The regional analysis of global BCG Vaccine market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world in terms of market share owing to the high prevalence of TB in Asian countries such as India, Pakistan, Bangladesh and others. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rapidly increasing government efforts in form of vaccination drives would create lucrative growth prospects for the BCG Vaccine market across Asia-Pacific region.
