Abstracts

Global Beer Market is valued approximately USD 594.5 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 3.20 % over the forecast period 2021-2027. Beer is the most extensively consumed alcoholic beverage on the planet. This beverage is often made from cereal grains such as maize, rice, and wheat. Furthermore, hops are used in the brewing process to impart bitterness, stability, and taste to the beer. Instead of hops, other flavoring additives such as herbs, fruits, and fruit might be used. The spike in demand for super-premium and high-end premium beer and modernization, urbanization, and shifts in consumer tastes and inclinations toward beer consumption has led to the consumption of beer during the forecasted period. The young generation is likely to continue to be the primary customer base of the alcohol sector. The growing number of clubs, bars, and brewers has also considerably boosted the beer market. According to the International Wines and Spirits Record (IWSR) press release, global beverage alcohol users consumed a total of 27.6 billion nine-litre cases of alcohol in 2018, and the IWSR predicts that overall alcohol consumption will steadily increase over the next five years, reaching 28.5 billion cases in 2023. According to the World Health Organization (WHO), beer accounted for around 36% of overall alcohol consumption in 2016. However, high excise charges and taxes on imported and domestic beer, as well as increasing public health concerns impedes the growth of the market over the forecast period of 2021-2027. Also, the abundance of raw materials foster more product manufacturing and rising demand for crafted beer is likely to increase the market growth during the forecast period.

The geographical analysis of global beer market is considered for the major regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to huge customer base, presence of large HoReCa sector and growing consumption of beer by young generation. Whereas, Asia-Pacific is also expected to display highest growth rate over the forecast period 2021-2027. Factors such as rising disposable income, the existence of large manufacturers and manufacturing, the availability of many and pleasant beer varieties, and the rapid urbanization would create lucrative growth prospects for the Beer market across Asia-Pacific region.
