## **Abstracts**

Global Behavioral health software Market is valued approximately USD 1.67 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 19.5 % over the forecast period 2021-2027. Behavioral health software can be referred to any software or system used within a medical context, such as standalone software used for diagnostic or therapeutic purposes software embedded in a medical device. Factors including increased adoption of behavioural health software and availability of government funding and investment in digital health industry is driving the market growth. For instance: As per the Statista number of investment deals made by investors in the global digital health industry from 2010 to 2020. In 2020, there were 770 deals made in the digital health industry. However, financial constraints impede the growth of the market over the forecast period of 2020-2027. Also, with the telehealth as a means of providing care services, the adoption for Behavioral health software would create strong affinity for market growth during the forecast period.

Global Behavioral health software Market is segmented on the basis of geographical reason as Asia Pacific, North America, Europe, Latin America and Rest of the World. , North America is deemed as leader of the market and witnessed robust growth owing to growing awareness and technological advancement in medical science. Whereas, Asia-Pacific is coming up as one of the promising regions as huge market growth is observed due to factors such as rising disposable income, improved health infrastructure, and rising population in the region.
