Global Beverage Stabilizer Market is valued at approximately USD 1.5 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 7.28% over the forecast period 2022-2029. Stabilizers are food additives that maintain a beverage's color, taste, and texture. Beverage stabilizers are used in many fast-food restaurants to increase the shelf life and appearance of the product. The beverage stabilizers market is growing due to rising demand in the food and beverage industry, and the adoption of nutritious foods & functional beverages are the key factors responsible for the Beverage Stabilizer Market growth over the forecast period of 2022-2029.

The primary key factor anticipated to accelerate the growth of the Beverage Stabilizer Market is the higher demand for healthier, and natural food ingredients in the food and beverage industry, various product launches and other strategic alliances by market players will accelerate the market growth. Also, in December 2019, RPM International Inc. announced that its Mantrose-Hauser Co., Inc. business had acquired Profile Food Ingredients, LLC, a manufacturer of stabilizer and emulsifier blends for the food industry. Moreover, the rising number of restaurant services and evolving of modern technologies in the beverage industry are anticipated to create a positive outlook for the market. However,

stringent government regulation and volatile raw material prices stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Beverage Stabilizer Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World.
