Abstracts

Global Billiard Chalk Market is valued approximately USD XX Billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028.

In cue sports like billiards and pool, billiard chinks are used to prevent players from making mistakes with their shots. The chalk helps the cueist take an accurate shot by preventing the cue tip from sliding while striking the ball firmly. The major driving factors for the market are rising number of pool and billiard hall sector globally. For instance, according to Statista, in 2019 the value of the market pool in the United States was USD 849.6 million in 2018 which is increased up to USD 861.8 million in 2019. Thus, rise in the value of the market is driving the growth over the forecasted period. In addition, easy of availability of the product is also driving the market growth for the market over the forecasted period. As these chinks can be procured online as well as offline e-commerce platforms such as Amazon, and Flipkart are selling billiard chinks. Furthermore, the market is creating lucrative growth opportunity as the market is witnessing the rise in sports and recreational sports activity. However, fluctuation of raw material price is limiting the market growth.

The key regions considered for the global Billiard Chalk Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market is because more people are playing pool and billiards, there is a significant demand for billiard chinks made of high-quality materials like silicon and aluminium oxide in developed nations like the United States and Canada. These materials also add the essential friction for a better game and to make shots. Whereas, due to urbanization and high participation in

recreational activities in nations like China, India, Japan, and other countries in Southeast Asia, the market in Asia Pacific is anticipated to grow at a significant growth rate during the forecast period, which is anticipated to increase demand for billiard chalk.
