Abstracts

Global Bioactive Compounds in Coffee Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Bioactive Compounds in Coffee refers to bioactive compound found in coffee. Various bioactive compounds in coffee are chlorogenic acids, caffeine, trigonelline, melanoidins and diterpenes . Bioactive compounds are essential for human health. These compounds offer multiple biological effects, such as reduction in risk factors of cardiovascular diseases, and antioxidant, antimutagenic, anticarcinogenic antiallergenic, anti-inflammatory, and antimicrobial activities among others. The rising prevalence of Parkinson's diseases and increasing use of bioactive compounds in carbonated drinks as well as surging incidences of lifestyle diseases are factors that are accelerating the global market demand. For instance, according to International Diabetes Federation (IDF) - In 2021, around 537 million adults (20-79 years) were living with diabetes. The total number of people living with diabetes is projected to rise to 643 million by 2030 and further 783 million by 2045. Furthermore, as per Parkinson's Foundation – in 2021, around 1 million people in the U.S. were living with Parkinson's disease (PD), and this number is expected to rise to 1.2 million by

2030. Also, growing number of geriatric individuals and rising consumption of nutritious food and beverages are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, health risks associated with over consumption of caffeine impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Bioactive Compounds in Coffee Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing prevalence of lifestyle disease and increasing consumption of caffeinated drinks in the region . Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as rising geriatric population and surging number of diabetic individuals in the region, would create lucrative growth prospects for the global Bioactive Compounds in Coffee market across the Asia Pacific in the region.
