Global Bioimpedance Device Market is valued at approximately USD 389.29 Million in 2021 and is anticipated to grow with a healthy growth rate of more than 10.2% over the forecast period 2022-2028. Bioimpedance Device is a lifting device that can be used to lift any large object. A single person can use and carry a Bioimpedance Device since it is flexible, strong, and safe. Increase in the population becoming health conscious and increase in the number of prevalent cases of chronic and lifestyle diseases, has driven the adoption of Bioimpedance Device across the projected period. For Instance: As per the WHO Report (2020), Obesity which is the most common lifestyle disease is now considered a global epidemic, with around 57.8% of all individuals estimated to be obese by 2030. Also, emerging market of developing regions like Asia Pacific is most likely to boost the overall growth of the Bioimpedance Devices market. However, fluctuating accuracy of Bioimpedance Devices can obstruct the market's expansion over the projection period of 2022-2028.

The key regions considered for the global Bioimpedance Device Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North

America is the leading region across the world. Growing government-funded initiative to overcome life-threatening diseases like obesity and blood pressure is driving the market growth in North America. Whereas, Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. The market is expected to grow during the projected period, due to surging patients with lifestyle diseases.
