Abstracts

Global Bioprocess containers market is valued at approximately USD 2.30 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 26.00% over the forecast period 2021-2027. BPCs are ready-to-use, single-use flexible container systems commonly used for critical sterile liquid-handling applications in the biopharmaceutical industry. BPC systems are cost-effective alternatives to conventional stainless-steel systems. Growing biologics market, rising investment in biopharmaceutical has led to the adoption of Bioprocess containers across the forecast period. For Instance: As per IBEF, India is among the top 12 destinations for biotechnology worldwide. The industry comprises >2,700 biotech start-ups and >2,500 biotech companies in the country. India has 665 FDA-approved plants in the US; 44% of the global abbreviated new drug applications (ANDA) and >1400 manufacturing plants, which are compliant with WHO. Also, with the Patent expiry of biologics, the adoption & demand for Bioprocess Containers is likely to increase the market growth during the forecast period. However, issues related to leachables and extractables impede the growth of the market over the forecast period of 2021-2027.

Global Bioprocess containers market is segmented on the basis of geographical region

as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is among the fastest-developing regions owing to the presence of established biopharmaceutical industry and major players in the region. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as rising population, government support for the biotechnology industry would create profitable growth prospects for the Bioprocess containers market across Asia-Pacific region.
