Abstracts

Global Biosimilar Monoclonal Antibody Market is valued approximately at USD 27.84 Billion in 2018 and is anticipated to grow with a healthy growth rate of more than 35.70% over the forecast period 2019-2026. Biosimilar monoclonal antibodies can be known as a biological molecule derived by the organisms and living cells. Also, it displays a certain level of variability which can be attributed to the variations in the biological expression systems of the recombinant. In addition, biosimilar monoclonal antibodies are widely used in various fields of diagnostics of diseases such as oncology, autoimmune and in various chronic diseases. The Biosimilar Monoclonal Antibody market to witness prominent growth owing to the incorporation of advanced mAbs (Monoclonal Antibodies). As a result, the demand & adoption for Biosimilar Monoclonal Antibody would increase thereby, making its way for the growth of the market. The growth of the market is primarily driven by the increase in prevalence of diseases, such as cancer and rheumatoid arthritis and growth in geriatric population globally. For Instance: according to World Cancer Research Fund International (WCRFI), breast cancer is the most common form of cancer in women worldwide with an average 2million new cases being detected every year. American Cancer Research Society (ACRS) anticipates by 2030, incident rate of breast cancer is expected to reach over 9.9million cases with over 5.5million annual deaths, primarily due to aging population. Similarly, as per the European Breast Cancer Coalition, incidence in the EU-28 in 2018 was estimated to be around 404,920. Thus, the demand for biosimilar monoclonal antibodies would increase as these drugs are normally administered in the treatment of cancer, chronic lymphocytic and leukemia. However, unfavorable government

regulations in developed regions along with the high cost associated with the manufacturing process of these drugs are expected to impede the growth of the market over the forecast period.

The regional analysis of global Biosimilar Monoclonal Antibody market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is expected to hold a notable share in the world in terms of revenue owing to the presence of advanced healthcare facilities along with the increasing adoption of biosimilar monoclonal antibodies. The dominance of the region is witnessed owing to the ongoing government activities to develop advanced and novel drugs. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period. Factors such as rising public-private initiative aimed towards boosting advance research practices and increase investment to promote Biosimilar Monoclonal Antibody research is expected to create lucrative prospects for the growth of the region during the forecast period of 2019-2026.
