Global Blast Chiller Market is valued approximately at USD 1.58 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.5% over the forecast period 2021-2027. A blast chiller is an equipment that quickly lowers the temperature of food. Blast chillers are also known as blast freezers or flash freezers. The blast freezers have multiple shelves where food pans or sheet pan can be stored and chilled at extremely low temperatures. The increasing adoption of blast chillers for quick chilling and preservation of food items in several industry applications is a driving factor for the market. Increasing consumption of frozen and packaged food items is also contributing to the market. High electricity consumption and expensive nature of blast chillers are restraining the growth of the market. Technological advancement such as artificial intelligence and IoT are giving the market the opportunities. These technologies provide real time data and ability to remotely control temperature settings. Industry players are launching innovative models of blast chillers. For instance: - Electrolux launched its new range of Skyline Chill blasters integrated with automation and AI technologies which allows the user to remotely monitor the chilling time and set the desired temperature.

The key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of global Blast Chiller market.
