## **Abstracts**

Global Blockchain Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Blockchain is a system in which a record of transactions made in bitcoin or another cryptocurrency are maintained across several computers that are linked in a peer-to-peer network. The increase in venture capital funding and investments in blockchain technology and lower operational costs has led to the adoption of Blockchain across the forecast period. For Instance: According to data provider Venture Intelligence, startups that include crypto, blockchain, a kind of digital ledger and non-fungible tokens (NFTs), or units of non-interchangeable data stored on blockchain, have raised \$511 million this year. Also, with the integration amalgamation of blockchain, IoT, and AI, the adoption & demand for Blockchain is likely to increase the market growth during the forecast period. However, security breaches impede the growth of the market over the forecast period of 2022-2028.
