Abstracts

Global Blue Light Protection Ingredients Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. As per a Haward health study over exposure of blue light from electronics devices like smartphone and digital screens causes chronic, low-grade inflammation which can turn into a silent killer and contributes to cardiovascular disease, cancer, type 2 diabetes, and other conditions. Some of the blue light protection ingredients are Gogi fruit, pomegranate, mangosteen, noni fruit, and astaxanthin among others. Generally, there are two types of ingredients which are conventional and organic. Increasing screen time and rising consumer awareness regarding harmful effects of over exposure of blue light are key drivers for the growth of Blue Light Protection Ingredients market. For instance, according to MedlinePlus, USA- as of 2020, American children spend around 3 hours a day watching TV. Added together, all types of screen time totals 5 to 7 hours a day. Also, as per UNICEF- during covid 19 lockdown in the year 2020, digital game distributors, reported rapid increase in the number of daily users from 19 million in early March to a record high of 23.5 million in early April. Also, in December 2021 Florence by Mills, a Los Angeles, CA based cosmetics company has launched the Blue Light Collection, a trio of skin care products for protecting skin from blue light exposure. It includes a moisturizer, toner and makeup setting spray. Also, with rising penetration of smartphones in emerging economies and rising research and development activities, new product launches from market players, the adoption & demand for Blue Light Protection Ingredients is likely to increase the market growth during the forecast period. However, high cost of organic ingredients and

slow penetration from developing economies impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Blue Light Protection Ingredients Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to increasing screen-time and growing awareness regarding blue light protection ingredients among the consumers in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as growing IT & BPO sector in the region would create lucrative growth prospects for the Blue Light Protection Ingredients Market across Asia-Pacific region.
