Global Bone Screw System Market is valued approximately USD 1.1 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 6.4 % over the forecast period 2021-2027. Bone screw is a metal implant inserted into the bone. Screws are used to fix fractured bone segments to aid in the healing process, and as an adjunct to spine fusion surgery to help hold implants in place. Growing prevalence of Musculoskeletal Disorders and increasing orthopedic diseases are key drivers for the growth of Bone Screw System market. For instance, according to as of 2020- versus arthritis organization, UK-In UK 20.3 million people (almost one third or 32% of the population) have a musculoskeletal (MSK) condition such as arthritis or back pain. Approximately 11.6 million women (35% of women have a MSK condition) and 8.7 million men (28% of men) have a MSK condition. Also, as per, World Health Organization (WHO) – as of 2021, every year approximately 1.3 million people lost their lives in road crash and between 20 and 50 million more people suffer non-fatal injuries, and many incur a permanent disability because of major injuries. Further, 93% of the

world's fatalities on the roads occur in low- and middle-income countries. Also, with the rising aging population globally and technological advancements in orthopedic treatment, the adoption & demand for Bone Screw System is likely to increase the market growth during the forecast period. However, negative impact of covid 19 on hospital industry impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Bone Screw System market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to rising frequency of orthopedic patients and road accidents in the region. Whereas, Europe is anticipated to exhibit highest growth rate / CAGR over the forecast period 2021-2027. Factors such as increasing prevalence of orthopedic disease among aging population would create lucrative growth prospects for the Bone Screw System market across Asia-Pacific region.
