Abstracts

Global BOPET Packaging Films Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. BOPET (Biaxially Oriented Polyethylene Terephthalate) refers to polyester film. BOPET films are made from polyethylene terephthalate (PET). BOPET films are used across Food, Beverages, and cosmetics sectors due to its high tensile strength, chemical and dimensional stability, transparency, gas and aroma barrier properties and electrical insulation. Growing food and beverages sector and growing demand for durable packaging solutions are key drivers for the growth of BOPET Packaging Films market. For instance, according to global database Management company Statista- as of 2020, the global market for non-alcoholic drinks was estimated at USD 1.03 trillion and as per projections by the year 2025 the market would amount to USD 1.44 trillion. In recent events in September 2020, Cosmo Films Ltd., Indian multinational developer of specialty films for packaging, lamination & labeling applications has developed a novel BOPP based clear thermal lamination antimicrobial films. The antimicrobial technology used in this packaging prevents bacterial infections on packaged items. Furthermore, in November 2021 UFlex has

started its new BOPET film manufacturing plant in Nigeria with a production capacity of 45,000 tons per annum. Also, with rapid advancement in Packaging Films and increasing demand for flexible packaging solution from end use verticals such as Cosmetics, Food and Beverages industries, the adoption & demand for BOPET Packaging Films is likely to increase the market growth during the forecast period. However, rising consciousness towards environmental concerns and disruptions in the global supply chain due to pandemic restrictions impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global BOPET Packaging Films Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to growing demand for packaged food products in the region. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as growing fast food product chains in the region would create lucrative growth prospects for the BOPET Packaging Films Market across Asia-Pacific region.
