Global Bottle Shippers Market is valued approximately USD XX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2020-2027. Bottle shipper is a type of container that is primarily used to hold and store bottles. Each bottle is nestled in a foam cavity that protects and supports the bottle from damage. Through foam wrapping, the successful handling of the glass bottles is carried out. Also, it is possible to customize the bottle shippers as required by brand owners. The growing demand for protective packaging solutions for the transport and storage of a variety of product types is expected to fuel industry trends for bottle shippers. Further, a major driving factor for the bottle shipping industry is also the large consumption of alcoholic beverages. A large number of manufacturers are concentrating on offering both cost-efficient and innovative packaging solutions that can dramatically improve the company's profitability. Manufacturers in the market for bottle shippers deliver customized solutions for brand owners and this versatility is expected to extend the companies' market foothold. It is anticipated that large usage of the commodity by myriad end-use sectors would raise the market size of bottle shippers. For Instance the increasing popularity of eco-friendly bottle shippers in developing and developed countries, resulting in increasing demand for bottle shippers. However, High-cost bottle shippers' raw materials impedes the growth of the market over the forecast period of 2020-2027.
