Abstracts

Global Bottled Water Packaging Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2029. Bottled Water Packaging offers the distribution and transportation of water across difficult areas. It offers safe drinkable water and relieves the burden of carrying several bottles while traveling. The Bottled Water Packaging market is expanding because of factors such as the rising bottled water consumption and growing disposable income in the forecast period

According to the International Bottled Water Association in 2020, Americans consumed 15 billion gallons of bottled water which is up around 4.2% from 2019. It is noted that each American drank around 45.2 gallons of bottled water in 2020, with an increase of around 3.5 from the previous year. And, bottled water's retail dollar sales reached USD 36.3 billion in 2020, with an increase of 4.7 percent from 2019. Whereas technological advancement in bottled water equipment and growing R&D activities by market players creates lucrative opportunities for the market. However, stringent regulations towards the use of plastics hamper the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Bottled Water Packaging Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the market in terms of revenue, owing to the increasing adoption of bottled water, higher living standards, growing disposable income, and increasing health consciousness. Whereas North America is expected to grow significantly during the forecast period, owing to factors such as increasing penetration of market players, and rising spending toward safe water.
