Abstracts

Global Bronchitis Treatment Market is valued at approximately USD 5921.89 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.64 % over the forecast period 2022-2028. Bronchitis is an inflammation of the bronchial tube lining that is accompanied by coughing up thicker, discoloured mucus. Bronchitis is a respiratory disorder in which the bronchi in the lungs become inflamed. Bronchitis, to put it another way, is an inflammation of the bronchial tubes that convey air to and from the lungs. Cough, weariness, shortness of breath, chest tightness, mucus production, and other symptoms of bronchitis are all prevalent. The increasing prevalence of smoking and increase in respiratory disorders has led to the adoption of Bronchitis Treatment across the forecast period. For Instance: as per the National Library of Medicine in 2022, each year, approximately 5% of adults get acute bronchitis. Approximately 90% of these seek medical counsel for the same reason. Acute bronchitis is one of the top 10 most prevalent illnesses among outpatients in the United States. As per the Institute for Health Metrics and Evaluation in 2021, Smoking's massive worldwide health toll is highlighted by the most complete data on global trends in smoking. In 2019, the number of smokers worldwide climbed to 1.1 billion, with tobacco smoking accounting for 7.7 million deaths globally, including one in every five male fatalities. According to Healthy People in 2020, asthma affects more than 25 million people in the United States. COPD has been diagnosed in around 14.8 million adults, with another 12 million persons waiting to be diagnosed. Also, the increase in Chronic obstructive pulmonary disease

(COPD) and increase in product approvals are likely to increase the market growth during the forecast period. However, drug release is subject to strict regulations, and approval costs are high which can obstruct the Market's expansion over the projection period of 2022-2028.

The key regions considered for the Global Bronchitis Treatment market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the increasing prevalence of smoking coupled with the increase in respiratory disorders. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as a growing tendency of young people to smoke, as well as an increasing number of strategic activities by market players would create lucrative growth prospects for the Bronchitis Treatment market across Asia-Pacific region.
