Global Bronze Market is valued approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Bronze is defined as an alloy that majorly consists of copper and other metals such as tin, zinc, and aluminum. Bronze is used in the construction of musical instruments, sculptures, and medals, and in industrial applications such as bushings and bearings. Bronze also has nautical applications owing to its resistance to corrosion. The hardness of the alloy allows it to be used in heavy-duty components, mostly in the aerospace industry. The growing demand for bronze from many end users such as marine, automotive, industrial, and aerospace & defense is anticipated to drive the demand for bronze. The key factor driving the market growth is rising research & development activities and growing demand for the bronze in aerospace industries owing to its lightweight property that improves the performance and endurance of the aircraft.

In aerospace industries bronze is used in the manufacturing of wheel & brake components, landing gear bushings, hydraulic components, actuators of aircraft and other aircraft applications. Thus, growth in aerospace & defense sector is boosting the adoption of bronze. For instance, according to the Boeing Market Outlook, aerospace and defense industry is estimated to be valued USD 8.7 trillion by 2028 from USD 8.1 trillion in 2018. In addition, technological advancements are expected to create

significant growth opportunities in the market over the forecast period. However, growing concern over the use of lead in bronze coupled with lack of skilled labors impedes the growth of the market over the forecast period of 2022-2029.

The key regions considered for the Global Bronze Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia Pacific is the dominating region across the world in terms of market share, owing to the growth in automotive manufacturing units and assemblies. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2022-2029. Factors such as growing marine industry, rising consumption of bronze, industrialization, and presence of key market players, would create lucrative growth prospects for the bronze market across Asia-Pacific region.
