Global Brushed Direct Current (DC) Motor Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Brushed Direct Current (DC) Motor features brushes, which are used to commutate the motor to facilitate it to spin. Brushed DC motors have applications in household appliances and automobiles. These motors are also used for paper machines, cranes, electrical propulsion, sewing machines, power tools, and steel rolling mills among others. Brushed DC motors offer several advantages such as Low costs, comes with Simple and inexpensive controller and these motors are Ideal for extreme operating conditions. The growing automotive Sector and low cost associated with brushed DC motors as well as recent product launches from leading market players are factors that are accelerating the global market demand. For instance, According to Statista -in 2021, the global automotive manufacturing market was estimated at USD 2.7 trillion, and it is projected to grow to USD 2.8 trillion U.S. dollars by end of 2022. Furthermore, in December 2020, Toshiba Electronic Devices & Storage Corporation launched two brushed DC motor driver ICs, named “TB9054FTG” and “TB9053FTG”, for use in automotive applications, such as throttle valves, various

engine valves, retractable door mirrors, and body systems among others. Also, growing Heating, Ventilation, and Air Conditioning Industry and increasing demand for household appliances are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, periodic maintenance requirements due wear and tear of brushes and increasing adoption of brushless DC motor impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Brushed Direct Current (DC) Motor Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to growing industrial applications of DC motors and presence of leading market players. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028.
