Global Busbar Trunking System Market to reach USD 11 billion by 2025.

Global Busbar Trunking System Market valued approximately USD 5.90 billion in 2016 is anticipated to grow with a healthy growth rate of more than 7.23% over the forecast period 2018-2025. Rising energy consumption because of increasing urbanization & industrialization, cost & operational benefits of busbar over cables and increasing concerns towards energy efficiency are the major factors which are driving the growth in the Global Busbar Trunking System Market. Besides this, the unstable cost of raw material hinders the market growth. A busbar is used in power distribution that conducts electricity inside a switchboard, distribution board, and other electrical devices. Busbar trunking system distributes the electric power by using aluminium or copper busbar with proper protection to provide damage prevention of cables by any means. Busbars are becoming popular because they provide more safety and convenience. The busbar has several benefits over traditional cables, the low trunking and cabling cost and the installation time is also less than traditional cables. Busbar trunking systems are mainly implemented in those applications where a quick electricity supply is required like remote areas. The busbar trunking systems can be categorized on the basis of power ratings which include low, medium and high power, type of insulation of air insulated and sandwich insulation. Some of the developing nations including Africa and the Asia Pacific are increasing investment to expand of distribution and transmission network to fulfill electricity demand in the remote and off-grid areas which has raised the demand of busbar trunking systems.

The regional analysis of Global Busbar Trunking System Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share. Whereas, owing to the countries such as China, Japan, and India, Asia Pacific region is anticipated to exhibit higher growth rate / CAGR over the forecast period 2018-2025.
