Abstracts

Global Buses and Coaches Market is valued approximately at USD 40.24 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.9% over the forecast period 2022-2029. Buses are typically utilized for short to medium-distance transit inside a city or metropolitan area. They are widely used for public transport and are run by either government or commercial companies. Meanwhile, Coaches, are commonly linked with tourism or long-distance transportation and are typically utilized for longer distance travel, such as intercity or international travel. The Buses and Coaches market is expanding because of factors such as increasing demand for commercial vehicles and growing emission levels from vehicles.

Buses and coaches play a critical role in public transportation, providing a convenient and efficient mode of travel for millions of people. They are important for reducing congestion on roads, promoting sustainable transportation, and connecting communities. According to the Statista, in 2021, around 26.3 million Commercial vehicles were sold globally. This is a year-on-year increase of around five percent compared to 2020 sales. The United States is the largest market for commercial vehicles that year. Furthermore, around 35 thousand buses and coaches were produced across India in 2021. Another important component driving space increase is growing emission levels from vehicles. As per Statista, the global transportation sector is a major polluter and in 2021 produced more than seven billion metric tons of carbon

dioxide. In addition, Global greenhouse gas emissions amounted to roughly 49.76 billion metric tons of carbon dioxide equivalent in 2019. The electricity and heat sector accounted for 32% of emissions in 2019, making it the biggest contributor to global GHG emissions. Combined, the electricity and heat sector and transportation sector are responsible for 50% of greenhouse gas emissions. Also, rising technological advancement in manufacturing of buses and coaches and rising government measures to limit emission levels would create a lucrative growth prospectus for the market over the forecast period. However, the high cost of Buses and Coaches stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Buses and Coaches Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominates the market in terms of revenue, owing to the presence of key market players in the region. According to Statista, the Buses market of North America is estimated to reach about USD 2.83 billion in 2023 and expected to show an annual growth rate of 1.16% in between the years 2023 to 2027. Furthermore, Asia Pacific is expected to grow fastest during the forecast period, owing to factors such as geographic expansion of key players, and active participation of government organizations in the market space.
