Abstracts

Global C-Reactive Protein Testing Market is valued approximately 1.67 USD billion in 2020 and is anticipated to grow with a healthy CAGR of 1.5 % over the forecast period 2021-2027.

C-Reactive Protein or CRP is a protein synthesized by liver. CRP testing is often done to detect inflammation in the body resulting from a serious infection after surgery, injury, or chronic diseases such as cancer, and cardiovascular ailments. A high CRP level in blood indicates that a chronic disease or an injury is severe. Rise in cardiovascular diseases and death resulting from it is a major driver of C-Reactive Protein Testing market. As per World Heart Federation, Coronary Heart Disease causes death of 3.8 million men and 3.4 million women every year. CRP is a good method of diagnosing a heart disease in early stages and keeping a track of its severity.

Another driving factor for the market is the sheer volume of tests required per every patient. With CRP tests conducted weekly or every couple few days in patients of arthritis, cardiovascular diseases, bowel disorders, the demand for CRP testing stays high.

However, lack of public awareness towards the benefits of CRP testing can impede market growth during the forecast period 2021-27. Nevertheless, development of new techniques for C-Reactive Protein testing is likely to increase the market growth during the forecast period.

Regional analysis of Asia Pacific, North America, Europe, Latin America, and Rest of the World, shows that North America is the most significant player across the world in terms of market share owing to the advanced medical infrastructure, prevailing cardiovascular diseases resulting from unhealthy lifestyle, and presence of established players. At the same time, North America is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as rising research partnerships, increasing government investments in pharmaceuticals, and increasing geriatric population would create lucrative growth prospects for the C-Reactive Protein Testing Market across North America region.
