Abstracts

Global Calcineurin Inhibitors Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Calcineurin Inhibitors can be defined as immunosuppressants (drugs or medicines that lower the body's ability to reject a transplanted organ) used to manage autoimmune conditions such as lupus nephritis, idiopathic inflammatory myositis, interstitial lung disease, atopic and dermatitis among others. Growing prevalence of prevalence of psoriasis and increasing cases of organ transplant as well as recent product launches from leading market players are key drivers for growth of Calcineurin Inhibitors Market. For instance, according to Global Psoriasis Atlas - as of 2021, around 60 million people are suffering from psoriasis worldwide. Furthermore, in USA around 3.65 million people are affected with psoriasis, whereas in UK around 1.01 million have psoriasis. Moreover, in December 2020, Biopharmaceuticals company Biocon launched Tacrolimus capsules in the US. Tacrolimus, a calcineurin inhibitor, is an immunosuppressant used in the treatment of

organ transplant patients. Also, growing number of research and development activities and rising healthcare infrastructure in emerging economies are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, side effects associated with calcineurin inhibitors impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Calcineurin Inhibitors Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to rising R&D activities and increasing prevalence of atopic dermatitis as well as presence of leading market players. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as growing healthcare sector and increasing penetration of global pharmaceuticals companies in the region, would create lucrative growth prospects for the Calcineurin Inhibitors Market across the Asia Pacific region.
