## Abstracts

Global Calcite Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Calcite is mineral component of limestone. Calcite is used in construction aggregates. Further, it also used in production of lime and cement. Calcite is used as construction material, abrasive and in agricultural soil treatment among others. Growing construction industry and rising Paper and Plastics Industries are key drivers for the growth of Calcite market. For instance, according to Oxford Economics- Global construction output in 2020 was projected at USD 10.7 trillion and the construction output is expected to grow by 42% or USD 4.5 trillion between 2020 and 2030 to reach USD 15.2 trillion. Furthermore, in June 2021, French industrial minerals company Imerys has expanded its presence in India and opened a new plant in Vishakhapatnam, Andhra Pradesh dedicated to the refractory and infrastructure markets. Also, with the increasing disposable income and rapid urbanization and growing investment in infrastructure projects, the adoption & demand for Calcite is likely to increase the market growth during the forecast period. However, high transportation cost of Calcite and global supply chain disruption due to pandemic restrictions impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Calcite market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the

leading region across the world in terms of market share owing to presence of leading market players and increasing penetration of commercial real estate projects in the region. Whereas, North America is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as increasing government spending in residential and commercial construction projects in the region would create lucrative growth prospects for the Calcite market across Asia-Pacific region.
